

Pairwise Spearman rho of t-statistics (Karpievitch et al. 2012)

Higher = methods rank proteins more similarly

Concordance At the Top (CAT) – each method vs consensus ranking

Irizarry et al. (2005) | Dashed line = 0.70 concordance

DEP counts per method per contrast (FDR < 0.05)

DEP counts across significance criteria
 Pi-score = $-\log_{10}(p) \times |\log FC|$ (Xiao et al. 2014); empirical p-value < 0.05
