

A

ORA Deduplication Sensitivity

Significant pathways across Jaccard cutoffs

Significant pathways (padj < 0.05)

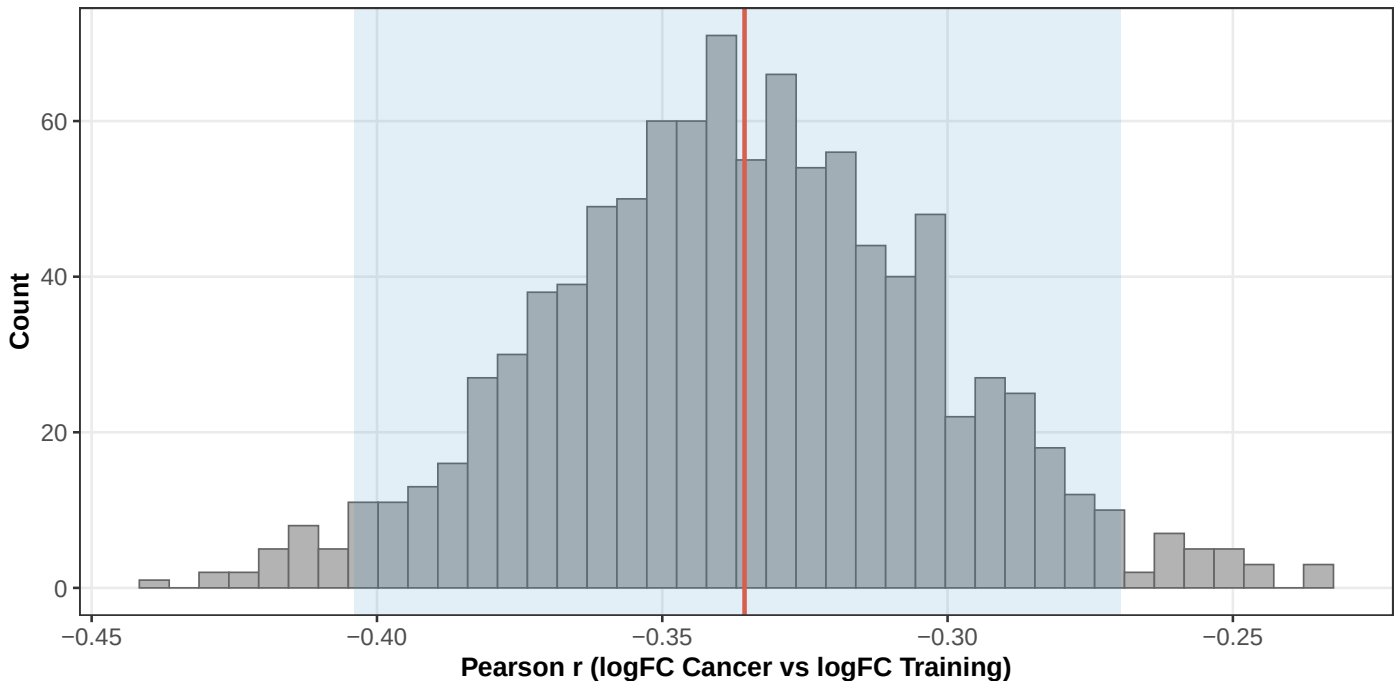

Quadrant Cancer Down / Training Up Cancer Up / Training Down

B

Bootstrap Distribution of Reversal r

1000 replicates, n = 1950 proteins

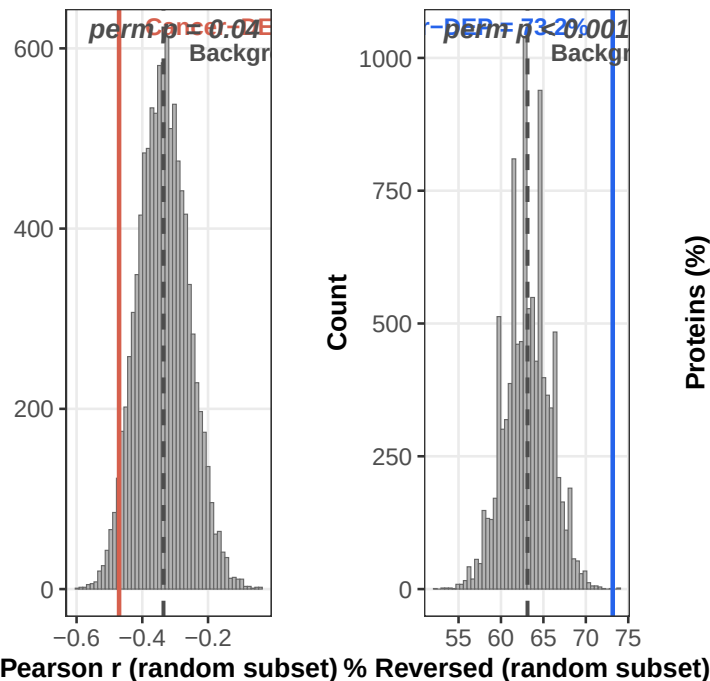

C

Subset Correlation Specificity

Null: r of 287 random proteins (Null 1950)

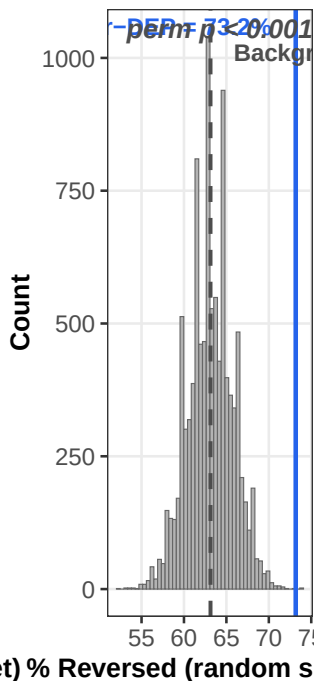

Count

D

Subset Reversal Fraction

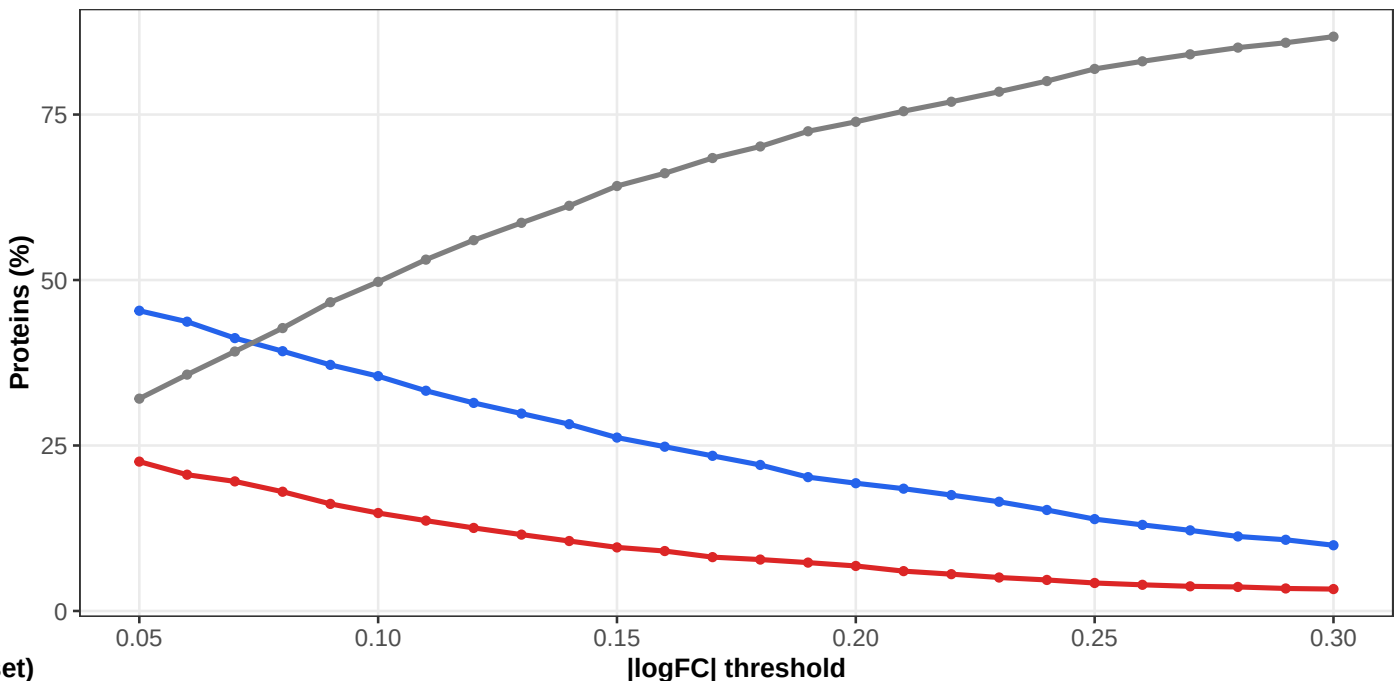

Null: r of 287 random proteins (Null 1950)

E

Reversal Sensitivity

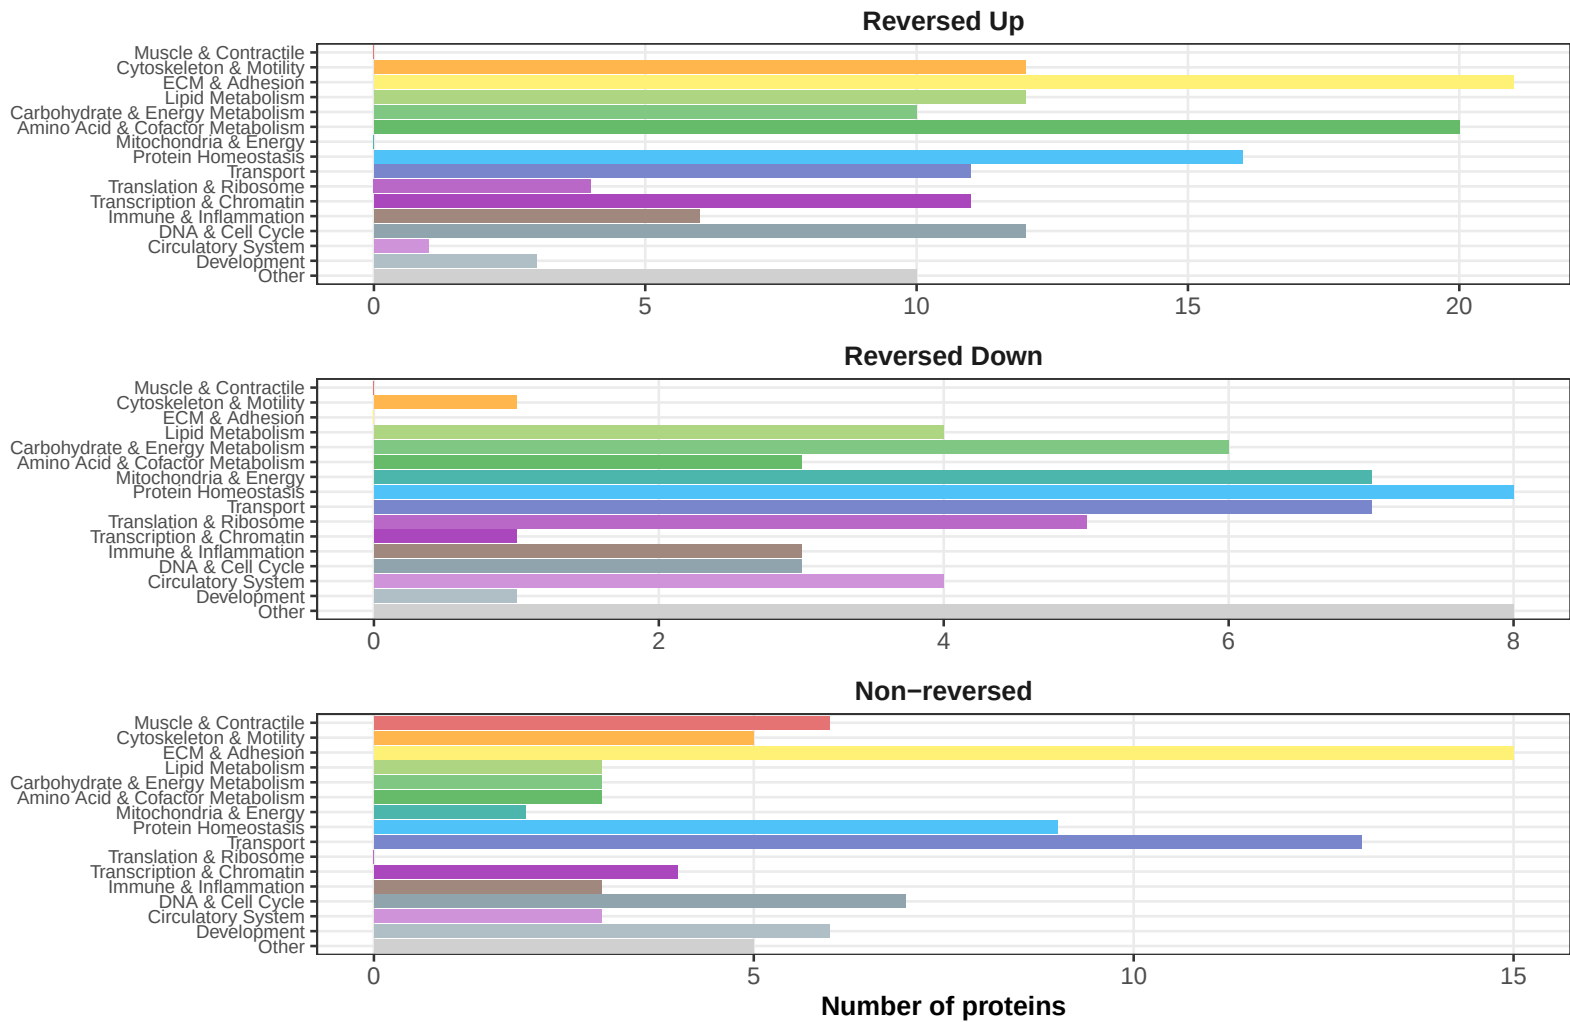

Apoptosis |logFC| thresholds

F

GO Slim category distribution

Pi-significant cancer proteins by reversal quadrant

G

Top 25 fry driving proteins

Ranked by |t| Training CR
