

A

Sample PCA (arms)

PERMANOVA $R^2 = 0.22$, $p = 0.001$ 

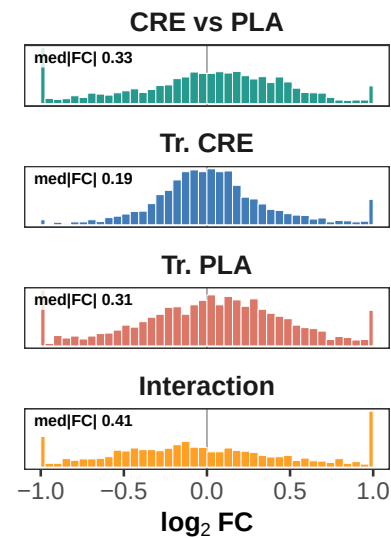

B

DEP counts

 $p / \text{FDR} / . \text{ nested per contrast}$ 

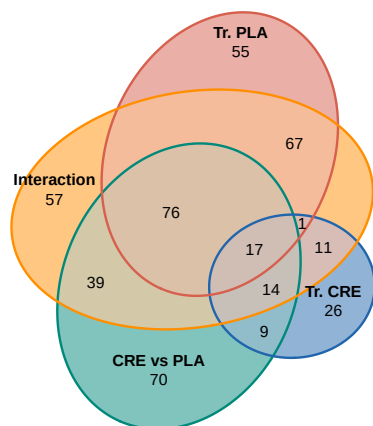

C

Effect size

 $\log_2 \text{FC}$ per contrast

D

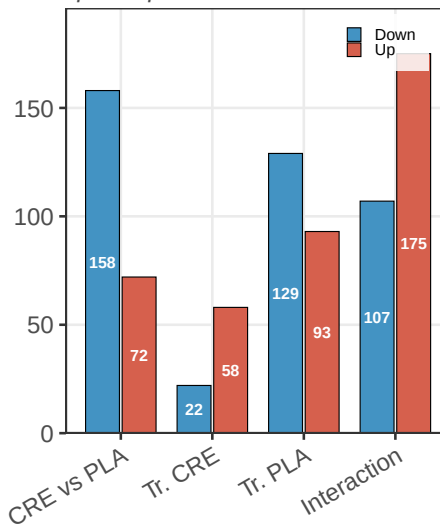

DEP overlap

 $p < 0.05$ sets

E

Direction

Up / Down per contrast

Proteins ($p < 0.05$)

F

Pathways

 $\text{fGSEA FDR} < 0.05$; up / down
